PROFESSIONAL SUMMARY

AI/ML and Full-Stack Developer pursuing a B.Tech in Computer Science (AI & ML), with experience building scalable SaaS applications, AI-powered platforms, and developer tools. Proficient in Python, TypeScript, React, Next.js, Node.js, FastAPI, and modern cloud-based architectures. Developed intelligent systems leveraging LLMs, knowledge graphs, vector search, and data-driven automation to solve real-world problems. Passionate about engineering high-performance products, designing robust backend systems, and transforming complex AI capabilities into impactful user experiences. Seeking opportunities to contribute to innovative teams building the next generation of AI and SaaS solutions.

EDUCATION

Bachelor of Engineering (AI ML)	2024 - 2028
Newton school of Technology, Pune	Grade: 7.82/10.0
Intermediate (Class XII)	2022 - 2023
Vivekanand International Public School	Grade: 90.0%
Matriculation (Class X)	2020 - 2021
Vivekanand International Public School	Grade: 95.0%

PROJECTS

CampusConnect ([Github](#)) ([Demo](#)) June 2026

- Built a full-stack university management platform with **role-based dashboards** (Admin, Student, Faculty, Recruiter) featuring JWT authentication, RBAC middleware, and **26-table normalized PostgreSQL schema** with 40+ indexes.
- Implemented **4 database triggers** (auto attendance calculation, audit logging, notification generation), **5 stored procedures** (enrollment, internship applications with CGPA eligibility checks), and **4 materialized views** for pre-computed analytics.
- Developed an **interactive SQL analytics engine** with 15 pre-built queries showcasing JOINs, window functions (RANK, LAG), correlated subqueries, and conditional aggregation — executable directly from the UI.
- Engineered an immersive **glassmorphism UI** with Three.js WebGL 3D starfield background, Framer Motion page transitions, Recharts data visualizations, and a custom Tailwind CSS design system.
- Containerized the entire stack using **Docker Compose** (PostgreSQL + Express + Nginx) with multi-stage builds, Prisma auto-migrations on startup, and Vercel-ready frontend deployment.

Novaris ([Github](#)) ([Demo](#)) March 2026

- Built **Novaris**, an AI-powered GitHub repository intelligence platform that analyzes codebases and developer profiles using **Agentic AI, LangGraph, and LLMs**.
- Developed a full-stack application with **Next.js, React, TypeScript, FastAPI, PostgreSQL, Prisma, and Tailwind CSS** for scalable repository analysis.
- Implemented AI-driven repository scoring for **Code Complexity, Architecture Maturity, Production Readiness, Engineering Leadership, and Technical Depth**.
- Integrated **GitHub APIs, commit-history analysis, dependency tracing, and developer intelligence workflows** to generate actionable engineering insights.
- Deployed a production-ready platform on **Vercel** with secure APIs and interactive analytics dashboards.

EvoX Ventures — Interactive Portfolio & Event Platform ([Github](#)) ([Demo](#)) January 2026

- **Platform Development:** Engineered and deployed the official digital experience for a premium event management brand, featuring a modular architecture to showcase diverse portfolios across sports, tech, and luxury events.
- **Performance Optimization:** Architected the platform using **Next.js and React**, implementing edge-optimized performance strategies and clean, reusable component patterns to ensure scalability and fast load times.
- **High-Fidelity UI/UX:** Elevated user engagement through **Framer Motion and Tailwind CSS**, integrating seamless page transitions, scroll-driven narratives, and hardware-accelerated animations for a polished, premium aesthetic.
- **Conversion Engineering:** Developed a dynamic "Get Quote" inquiry engine, streamlining client scoping and requirement collection through a responsive, multi-step interface.
- **Production Deployment:** Managed the full development lifecycle, from initial implementation to deployment on **Vercel**, incorporating production-grade configuration and SEO optimization to maximize visibility and site reliability.

SHUTTLE TRACKER ([Github](#)) ([Demo](#)) May 2025

- Contributed to building a **real-time bus tracking system** to improve campus transportation efficiency
 - Implemented **live GPS tracking using map-based APIs (Google Maps/Mapbox)** to display shuttle locations dynamically
 - Developed **ETA prediction and route visualization features**, enabling efficient travel planning
 - Built a **responsive, cross-platform user interface** for seamless access on mobile and web
 - Integrated **real-time data handling via APIs**, ensuring accurate and up-to-date location tracking
 - Enhanced user experience by improving **visibility, reliability, and reducing uncertainty in shuttle arrival times**
 - Collaborated in a team environment, contributing to **frontend development and feature integration**
- Tech Stack:** React.js, JavaScript, HTML, CSS, Node.js (if used), REST APIs, Google Maps API (or Mapbox), Git

CERTIFICATIONS

Certificate of Appreciation EvoX Ventures ([Link](#)) January 2026

- Awarded **Certificate of Appreciation** for serving as **Lead Developer** of EvoX Ventures' official platform
- Designed and delivered a **production-ready, scalable web application** with advanced UI/UX and interactive features

- Recognized for **end-to-end ownership**, from design to deployment, improving overall user experience and brand positioning

Letter of Recommendation Newton School of Technology ([Link](#))

July 2025

- Awarded a **Letter of Recommendation** for key contributions to a **real-time transportation tracking platform**
- Engineered core modules including **live tracking, route visualization, and user-centric interface design**
- Recognized for **analytical thinking, ownership, and collaborative development** in delivering a production-ready solution
- Delivered a system that improved **accessibility and reliability of campus transport information**

SKILLS

Computer Language: CSS, HTML, JavaScript, Python, SQL, TypeScript, Chart.js, Claude Code, Data Structures and Algorithms, DBMS, DevOps, Django, FastAPI, Express JS, Figma, Gemini API, GenAI, Google Cloud Platform, Hugging Face, Kubernetes, LangChain, LangGraph, LLM, Mobile Application Development, n8n Introduction, MongoDB, Natural Language Processing, Next JS, Nginx, OAuth 2.0, OpenAI API, RAG, PyTorch, Pyspark, Scikit-learn, SciPy, Tableau, Tailwind, Tailwind CSS, Supabase, Three.js, API, AngularJS, Deep Learning (DL), TensorFlow, API testing, AWS, Docker Compose, ESLint, Framer Motion, PostgreSQL

Courses: Data Structure

Databases & Data Tools: Excel, MySQL, NoSQL, Spreadsheet

AI / ML: Generative AI, Machine Learning

Cloud & DevOps: Docker, Git and Github, GitHub Actions, Windows

Domain & Business Skills: Photoshop, Social Media, UI/UX

Frameworks & Libraries: Microsoft Office, Next.js, Node.js, NumPy, Pandas, React, React Native
